Location: San Francisco, CA

Professional Summary

Experienced Senior Software Developer with 6+ years of expertise in full-stack web development, specializing in React, Node.js, and cloud technologies. Proven track record of leading development teams, implementing scalable solutions, and delivering high-quality software products in agile environments. Strong background in fintech and e-commerce domains with experience in microservices architecture and DevOps practices.

Technical Skills

Programming Languages

JavaScript, Python, Java, TypeScript, SQL

Frontend Technologies

React, Angular, Vue.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend Technologies

Node.js, Express, Django, Flask, Spring Boot, RESTful APIs

Databases

PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps

AWS, Docker, Kubernetes, Jenkins, CI/CD, Git, Linux

Other Technologies

GraphQL, Elasticsearch, Apache Kafka, Microservices

Professional Experience

Senior Software Developer

TechCorp Solutions • San Francisco, CA • Jan 2021 - Present

- Lead a team of 5 developers in building scalable web applications using React, Node.js, and AWS
- Architected and implemented microservices architecture serving 100K+ daily active users
- Developed RESTful APIs and GraphQL endpoints for mobile and web applications
- Implemented CI/CD pipelines using Jenkins and Docker, reducing deployment time by 60%
- Collaborated with product managers and designers in agile development environment
- Mentored junior developers and conducted code reviews to maintain high code quality
- Optimized database queries and implemented caching strategies, improving performance by 40%

Full Stack Developer

FinanceApp Inc • San Francisco, CA • Jun 2019 - Dec 2020

- Developed fintech applications using React, Python Django, and PostgreSQL
- Built secure payment processing systems with PCI compliance requirements
- Implemented real-time data visualization dashboards for financial analytics
- Worked with cross-functional teams to deliver features in 2-week sprints
- Integrated third-party APIs for banking and payment services
- Participated in system design discussions and technical decision making

Software Developer

WebSolutions LLC • San Jose, CA • Aug 2018 - May 2019

- Developed e-commerce platforms using JavaScript, HTML5, CSS3, and MySQL
- Built responsive web applications with modern frontend frameworks
- Implemented automated testing suites and maintained 90%+ code coverage
- Collaborated with UX/UI designers to create intuitive user interfaces
- Participated in scrum ceremonies and agile development processes

Education

Bachelor of Science in Computer Science

University of California, Berkeley • 2014 - 2018

Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Computer Networks

Certifications

- AWS Certified Solutions Architect - Associate (2022)
- MongoDB Certified Developer (2021)
- Certified Scrum Master (CSM) (2020)

Projects

E-commerce Platform

Built a full-stack e-commerce platform using React, Node.js, and MongoDB. Implemented features like user authentication, payment processing, inventory management, and real-time notifications. Deployed on AWS with Docker containers.

Task Management API

Developed a RESTful API for task management using Python Flask and PostgreSQL. Implemented JWT authentication, role-based access control, and comprehensive API documentation with Swagger.
